

Fifth Central- and Eastern European Conference on
Computer Algebra- and Dynamic Geometry Systems
in Mathematics Education
26-29 September, 2014 Halle (Saale), Germany

Workshop

DYNAMIC VISUAL RESOURCES FOR 16-19 MATHEMATICS

Kate Mackrell

Institute of Education, University of London, UK

A resource using dynamic geometry software is being co-developed by teachers in Ontario and England for the new International Baccalaureate Mathematics at standard and higher level, but also useful for other mathematics courses at this level. The aim is to promote student exploration of mathematics in dynamic and visual ways. We will present some of the resources for Geometer's Sketchpad and Cabri - come and look at new ways to explore sequences and series, functions, vectors, calculus...
